

Indian Creek
Mendocino County

May 13, 1954

FIELD NOTE

Indian Creek is a tributary to Anderson Creek. It has had a large majority of its watershed logged off. Warden Norton reports that steelhead uses a large part of this stream for spawning each year. Mr. Shaefer, a logging contractor on subject creek, has provided Warden Norton with a bulldozer and operator to clear out log jams on this creek thus providing more spawning area for the steelhead in the 1953-54 season.
